

Endsleigh Loop Rewards

Endsleigh Loop encourages new drivers to be safe on the roads by rewarding them for their efforts to [improve your driving skills](#).

How does it work?

We'll use data from the telematics device (or 'black box') in your car to provide you with your driving score. We'll also give you feedback on speed, acceleration, braking and cornering as you drive – so you can see how you're doing regularly!

As well as giving you tips to help improve your driving, we want to show you that we care just as much when you've been driving well. That's why every month we send a reward to the 100 most improved drivers.

What reward could I win?

If you're one of the 100 most improved drivers, you could win a £10 Amazon e-voucher to do whatever you'd like with!

How can I get a reward?

All you need to do is drive sensibly, keep an eye on your feedback in your app/account, and take note of the tips we'll give you to help you improve.

Your score will appear in your app every 10 days as long as you've driven at least 40 miles in that period. You'll be able to see your progress throughout the year – and safer driving could mean a lower premium when you renew your policy.

How will I know if I've earned a reward?

We'll drop you an email to let you know that you've earned a reward and to give you access to your e-voucher.

When am I not eligible for a reward?

- If you have not driven at least 40 miles in a period of 10 days
- If you have achieved a driving score of 60 or less
- If you have received an intervention message in the current quarter
- If your score has reduced

Overall, Endsleigh Loop is a great way to become a better driver, get cheaper insurance and earn rewards along the way. Good luck!
